Subject: EPA Sampling
Date: Saturday, April 20, 2013 11:10:00 AM

Stevie/Frank,

Per your verbal approval EPA plans to sample various locations along City of West or McClennan County street right of ways along the perimeter of West Fertilizer Company property, West Middle and Elementary School, and a park near Stillmeadow Drive. EPA will also take samples at locations outside the affected area for background comparison. These samples will be analyzed to assist in determining and addressing any potential public health and safety concerns that may or may not exist in the surrounding residential and commercial areas. Once results are assessed and validated by EPA toxicologist a copy will be made available to City and County officials.
